

ComPass B 2.0 | ComPass Bs 2.0

Directional fault indicator with monitoring and control function

ComPass Bs 2.0

Product features

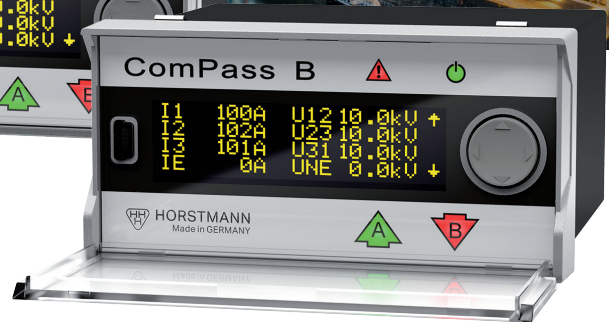

- Clear fault indication and reading on-site: 2 directional arrow LEDs (A, B) and high contrast OLED display
- High-precision current and voltage measurement (0.5 %)
- Monitoring of the parameters voltage (V), current (I), load flow direction (A↑ or B↓), power factor (cos φ), power (P, Q, S), energy (E), temperature (T) and frequency (f)
- Suitable for all types of networks/neutral point treatments
- Earth fault detection with 6 different earth fault detection methods, also in combination
- Voltage monitoring with connection to capacitive and resistive (ohmic) sensors in one indicator
- Limit monitoring: V, I, P, Q, T
- ComPass Explorer Software: Commissioning and parameterisation via front accessible USB port

Additional features of the Control ComPass Bs 2.0:

- Control ComPass Bs 2.0 for remote controlling of a load-break switch or circuit-breaker
- Free assignment of six binary inputs for the collection and transmission of relevant switchgear/station data
- Freely programmable logic for flexible definition of switchgear conditions

Your advantages

- Immediate detection of fault direction
- Immediate detection of limit violations
- Measured values available for SCADA and on site
- Automatic self-calibration of the capacitive voltage inputs, optionally with temperature compensation
- Only ComPass Bs: Remote switching

ComPass B 2.0

The ComPass B 2.0 is suitable for use in substations with a remote control connection of the electrical power distribution in a medium voltage network. In addition to the short-circuit and earth fault function, ComPass B 2.0 supplies the collected measured values of current, voltage and power from the station for transmission to the control room. The PT-100 sensor measures the temperature, for example of the transformer or the transformer station. For all measured values limits can be defined, which can also be transmitted to the control room.

The voltage coupling/measurement is done via the capacitive VDS system and/or via resistive (ohmic) voltage sensors. With the simultaneous measurement, the voltage measurement of the VDS system can be automatically calibrated with the resistive voltage measurement. Up to four ComPass B can be connected to one set of resistive voltage sensors.

In addition to the functions of the ComPass B 2.0, the Control ComPass Bs 2.0 offers a control function for switching a load-break switch or circuit-breaker. A free assignment of six binary inputs in combination with a freely programmable logic (PLC functionality) enables the user to define the switching conditions in a flexible manner. Random information, such as the SF6 gas disruption or HV tripped fuse, can be captured via the binary inputs.

Horstmann products are in step with the times:

As grids become increasingly complex and heterogeneous, greater demands are placed on the availability of electricity networks. The increasing use of renewable energy sources and the desire for decentralisation play important roles in this development.

The Horstmann solution:

Information based network monitoring – the iHost system reduces power outage times thanks to quicker availability of information.

The iHost system collects data from devices such as from the short-circuit and earth fault indicators in the field (e.g. of the Compass series – see page 44), evaluates the data in a data concentrator and shares it with the control room systems and/or mobile terminals. Fault information and exceeded limits can also be send by e-mail or SMS.

Advantages at a glance:

- Current information about network performance
- Continuous network supervision prevents power outages
- Alerts in the case of faults or irregularities
- Analysis tools for increasing network visibility

Product features:

- Data concentrator for short-circuit and earth fault indicators
 - Bundles and processes all data received from remote field devices
 - Provides data access at any time in various ways and devices
- Central management of all field devices – with one click
 - Grid monitoring: system overview, data analysis, health checks
 - Configuration and firmware updates from SCADA
- Data on demand
 - Customised visualisation of data and alarms
 - Individual notifications, generated automatically
- Embedded database
 - Grid data available from day one of installation
 - Flexible data provision for asset management, planning, engineers and further user

iHost Cloud

iHost Compact

iHost Cloud

For smaller scale projects or pilot schemes iHost Cloud is the best choice. Quick and easy implementation works without software installation. Handling is very user-friendly – all you need is a web-enabled device, your username and password. Customised notifications in case of a fault or alarms are possible via SMS and e-mail.

iHost Compact

If you want to see the data in your SCADA, iHost Compact is the right choice. With this solution iHost becomes part of your SCADA infrastructure. Installed on a physical or a virtual server iHost is a gateway that processes all data and forwards them directly to your SCADA. With iHost Compact you manage all remote devices installed in the power network.

iHost Solo

iHost Pro

With iHost Solo and iHost Pro all measured values as well as fault information are transferred directly to your SCADA and are available on mobile devices at the same time. All data is stored in iHost. Installed in your premises these solutions provide you multiple options regarding the use, analysis and visualisation of data.

iHost Solo

iHost Solo is designed for medium sized distribution networks whereas iHost Pro can handle the variety of remote devices, even of large distribution utilities.

iHost Pro

Complete with high availability resilience the system supports all departments of your company. The system can be tailored for user groups depending on their requirements.

Reporter 4.0

Remote monitoring to iHost

Reporter 4.0

Product features

- Detection and forwarding of digital states as generated e.g. by short-circuit or earth fault indicators, door contacts etc.
- Transfer via bidirectional data connection to iHost
- Auxiliary supply necessary

The Reporter 4.0 is used for the remote signalling of short-circuits, earth faults and additional status reports from a medium-voltage network. The information is transferred by ComPass B or ComPass B 2.0 in particular. Voltage, current, load flow direction, power factor, power, energy and frequency are also measured and monitored. The received reports are transferred to iHost through a bidirectional data connection. The Reporter 4.0 is housed in robust, weather-proof housing for wall mounting and can be configured using Windows-based PC software and iHost.

Reported short-circuits and earth faults are securely sent to SCADA via the iHost system and can be retrieved by any web-enabled device at any time. Notifications can also be received by e-mail and/or SMS.

| Technical data | Reporter 4.0 |
|---------------------------|---|
| Special features | <ul style="list-style-type: none"> ▪ Routine call ▪ Automatic date and time synchronisation ▪ Transmission of signal field strength ▪ Temperature sensor ▪ Fault and status notification via SMS and/or e-mail |
| Inputs | <ul style="list-style-type: none"> ▪ 16 digital inputs (hardware) ▪ 8 analogue inputs (4–20 mA) (hardware) ▪ 63 Modbus (digital) – 47 if hardware inputs are used ▪ 68 Modbus (analogue) – 60 if hardware inputs are used |
| Interfaces | Modbus |
| Communication | Bidirectional data connection to iHost |
| Indication | Control LEDs for data reception/ connection/ fault indicators |
| Power supply | |
| Internal power supply | Back-up battery, max. 24 h |
| External auxiliary supply | 100–240 V AC (50–60 Hz) |
| Housing | Glass fibre reinforced polyester, IP66 |
| Installation | Wall mounting |
| Temperature range | –20 to +65 °C |

Accessories

For short-circuit and earth fault indicators and integrated voltage detecting systems

Wall-mounted housings

for the installation of short-circuit and earth fault indicators as well as integrated voltage detecting systems outside the switchgear

W x H x D
125 x 75 x 125 mm
Order no.
49-9001-001 bottom cable entry
49-9001-002 rear cable entry

W x H x D
125 x 175 x 125 mm
Order no.
V49-9001-004-001
incl. earthing bar

W x H x D
125 x 75 x 75 mm
Order no.
49-9001-006

W x H x D
290 x 77 x 200 mm
Order no.
V49-9001-007-001
incl. earthing bar

External signal lamps

for installation outside the switchgear

| 3 LEDs | Order no. |
|--|-------------|
| 5 m connection cable, with battery, for permanent contact | 49-0702-005 |
| 10 m connection cable, with battery, for permanent contact | 49-0702-010 |
| 15 m connection cable, with battery, for permanent contact | 49-0702-015 |

| Bicolour 3 LEDs red/green | Order no. |
|------------------------------------|-------------|
| 3 m connection cable, with battery | 49-0706-001 |

| Bicolour 1 LED red/green | Order no. |
|---|-------------|
| 2 m connection cable, with battery, without fibre optic cable (see page 57) | 49-0704-001 |

Installation system

for Sigma D series and ComPass series

| | | Order no. |
|---|--|-------------|
| Tablet for parameter setting during installation or monitoring, incl. cover, pencil, power supply and USB cable | | 49-6022-010 |

Temperature sensor PT100

| | | Order no. |
|-------------------|-----------------------------|-------------|
| Temperature range | -50 to +180 °C | 49-9090-013 |
| Dimension | 6 x 50 mm | |
| Cable length | 10 m (silicone, 2 ferrules) | |
| Protection degree | IP65 | |

Fibre optic cables

| | | Order no. |
|--|--|-------------|
| Fibre optic cable 3 m (standard length for short-circuit CTs) | | 49-0602-009 |
| Fibre optic cable 4 m (standard length for earth fault CTs) | | 49-0602-001 |
| Fibre optic cable 1,8 m (standard length for external signal lamp) | | 49-6007-206 |

Accessories for Opto series

| | | Order no. |
|-------------------------------------|--|-------------|
| Cutting tool for fibre optic cables | | 49-0109-003 |

| | | Order no. |
|--|--|-------------|
| Transformer with cable for top-hat rail mounting (115 V – 230 V AC / 24 V – 48 V AC) | | 49-0921-002 |

| | | Order no. |
|---|--|-------------|
| Optical testing unit to excite the indicator for connection to the fibre optic cable plug | | 49-0109-002 |

Accessories for plug-in housing

| | | Order no. |
|---|--|-------------|
| Disassembly clip | | 49-9090-016 |
| Disassembly clip for ComPass B 2.0 / Bs 2.0 | | 49-9090-017 |

| | | Order no. |
|--|--|-------------|
| Spring clip suitable for 2 mm front plate thickness (standard) | | 49-9090-018 |
| Spring clip suitable for 3 mm front plate thickness | | 49-9090-019 |
